

SHUWEN GONG

ADAS & Active Safety · System Modelling & Control

PROFILE

M.Sc. student in Mobility Engineering at Chalmers, focused on ADAS, active safety, and vehicle system modelling and control. Three years in fighter-aircraft final assembly and four and a half years designing rule systems for live-service games: the habit of looking at the whole system before changing a part.

CONTACTS

jiayoua-panda.github.io
linkedin.com/in/shuwengong
github.com/Jiayoua-Panda
Gothenburg, Sweden

SKILLS

Modelling & Control

MATLAB, Simulink, QSS
State feedback, observer design
Signal processing, powertrain models

Vehicle Safety

ADAS intervention logic
Active & passive safety
LIDAR / IMU field testing
Crash-pulse analysis

Software

Python, Git

Systems & Process

PFMEA, process planning
PDM / ERP / CAPP
CATIA, CAD

Languages

English (IELTS 6.5)
Chinese (native)
Swedish (learning)

EDUCATION

M.Sc. Mobility Engineering

Chalmers University of Technology

2025.09 – 2027.06 (expected)

Gothenburg, Sweden

- Focus: ADAS and active safety, vehicle dynamics, and system modelling and control.
- Coursework: Vehicle and Traffic Safety; Systems and Mechatronics for Mobility Engineering; Electric and Hybrid Vehicles; Propulsion and Energy Systems for Transport; Connected Fleets in Data-Driven Engineering; Image Analysis; Object-Oriented Programming in Python.
- Project work: state-feedback reversing controller with observer for a tractor-semitrailer (Simulink); series and parallel HEV powertrain design (QSS); ride-comfort analysis on Volvo 7900 Electric bus IMU data; cyclist-overtaking field study with a LIDAR-instrumented bicycle. Reports and code: jiayoua-panda.github.io.

B.Eng. Aircraft Manufacturing Engineering

Nanjing University of Aeronautics and Astronautics (NUAA)

2013.09 – 2017.06

Nanjing, China

- Coursework in dynamics, materials science, control system fundamentals, and engineering mathematics.

WORK EXPERIENCE

Production Engineer, Aircraft Final Assembly

AVIC Chengdu Aircraft Industrial (Group) Co., Ltd.

2017.07 – 2020.05

Chengdu, China

- Process planning and PFMEA for fighter-aircraft final-assembly stages; coordinated mechanical, avionics and quality teams across multi-stage integration.
- Led on-site technical support in Pakistan for a new aircraft model deployment.
- First inventor of a granted utility-model patent (CN 210090631 U), a portable weight-on-wheels switch inspection device that made a flight-critical check fast and repeatable.
- Production systems: PDM, ERP, CAPP.

Game Systems Designer

Aoshitang (Shanghai) · Zlong Games (Beijing) · Duoyi Network (Guangzhou)

2020.08 – 2025.02

China

- Owned economy and progression rule systems, feature roadmaps and live-ops planning for four shipped live-service games reaching hundreds of thousands of players.
- Defined KPIs, read player behaviour data after each release and tuned systems accordingly; redesigned one game's monetisation model while keeping revenue stable.
- Localisation and dual-version development for an overseas release (Callis Chronicles).

ADDITIONAL EXPERIENCE

Psychological Support Volunteer | KnowYourself

China, 2019.07 – 2019.12

Head of Editorial Department | Lihuo Anime Club, NUAA

China, 2013.09 – 2017.06
